Wedd, A.G., 5

SUBJECT INDEX

Bulky ligands
Compounds of elements of Groups 11–13 containing $(Me_3Si)_3C$, $(PhMe_2Si)_3C$ or related ligands 125

Dinuclear mixed metal system
Some basic research in coordination chemistry and catalysis related to applications for industry 179

FeMoco
Reactions of small molecules at transition metal sites: studies relevant to nitrogenase, an organometallic enzyme 83

Group 11
Compounds of elements of Groups 11–13 containing $(Me_3Si)_3C$, $(PhMe_2Si)_3C$ or related ligands 125
Group 12
Compounds of elements of Groups 11–13 containing $(Me_3Si)_3C$, $(PhMe_2Si)_3C$ or related ligands 125
Group 13
Compounds of elements of Groups 11–13 containing $(Me_3Si)_3C$, $(PhMe_2Si)_3C$ or related ligands 125
Group 16
From nitrogen fixation to catalysis, diagnosis and therapy 163
Group 17
From nitrogen fixation to catalysis, diagnosis and therapy 163

Heterogeneous catalysis
Some basic research in coordination chemistry and catalysis related to applications for industry 179
Homogeneous catalysis
Some basic research in coordination chemistry and catalysis related to applications for industry 179
Hydrazine
Transition metal complexes containing hydrazine and substituted hydrazines 193

Industry
Some basic research in coordination chemistry and catalysis related to applications for industry 179

Ligand substitution reactions
Recollections of early studies on platinum(II) complexes related to Chatt's contributions to coordination chemistry 151

Metal
Transition metal complexes containing hydrazine and substituted hydrazines 193
Methanol carbonylation
From nitrogen fixation to catalysis, diagnosis and therapy 163

Nickel
The chemistry of group 10 metal *triangulo* clusters 19
Nitrogenase
Reactions of small molecules at transition metal sites: studies relevant to nitrogenase, an organometallic enzyme 83
NMR
Transition metal complexes containing hydrazine and substituted hydrazines 193

Olefin metathesis
From nitrogen fixation to catalysis, diagnosis and therapy 163
Oxo-molybdenum enzyme
Aspects of the chemistry of oxo-molybdenum enzyme centers 5

Palladium
The chemistry of group 10 metal *triangulo* clusters 19
Platinum
The chemistry of group 10 metal *triangulo* clusters 19
Platinum(II) complexes
Recollections of early studies on platinum(II) complexes related to Chatt's contributions to coordination chemistry 151
Polynuclear compounds
New chemistry of vanadium(II) 71
Polynuclear mixed metal system
Some basic research in coordination chemistry and catalysis related to applications for industry 179
Preparation
Transition metal complexes containing hydrazine and substituted hydrazines 193

Radiopharmaceuticals
From nitrogen fixation to catalysis, diagnosis and therapy 163

Structure
Transition metal complexes containing hydrazine and substituted hydrazines 193

Thiolate ligand
From nitrogen fixation to catalysis, diagnosis and therapy 163
Trans effect
Recollections of early studies on platinum(II) complexes related to Chatt's contributions to coordination chemistry 151
Transition metal site
Reactions of small molecules at transition metal sites: studies relevant to nitrogenase, an organometallic enzyme 83
Transition metal/unsaturated hydrocarbon interaction
Some basic research in coordination chemistry and catalysis related to applications for industry 179
Triangulo clusters
The chemistry of group 10 metal *triangulo* clusters 19

Vanadium(II) compounds
New chemistry of vanadium(II) 71
